For additional terms and conditions, please refer to additional sections in this document.

Thank you for choosing Epiphan Video!

At Epiphan Video, product function and quality are our top priority. We make every effort to make sure that our products exceed your expectations.

Product feedback

Your feedback is important! We regularly contact our customers to ensure our products meet your performance and reliability requirements. We strive to continually enhance our products to accommodate your needs. Please let us know how you think we can improve our products by emailing your suggestions to info@epiphan.com.

Specifications

Go to the [USB Video Grabbers](#) page of the Epiphan Video website to get the most recent product specifications and additional information about AV.io 4K.

Warranty

All Epiphan Video products are provided with a 100% return to depot warranty for one year from the date of purchase.

Technical support

Epiphan's products are backed by our professional support team. If you are having issues with your product, please gather details about your system and contact our team by:

- E-mailing support@epiphan.com
- Live chat via the link on our [support site](#)
- Phone toll free at 1-877-599-6581 or call +1 613-599-6581

Be sure to include as much information about your problem as possible, including:

- Problem description
- Details of the video or audio source (type, resolution, refresh rate, etc.)
- Product serial number
- Your operating system and version number

Firmware 3.0.0 release notes

Firmware 3.0.0 is the inaugural release for AV.io 4K, bringing the effortless, high-quality video capture experience from AV.io HD to 4K resolutions.

Overview

AV.io 4K is the easiest 4K capture card you'll ever use. It doesn't need any special drivers installed on your computer – plug it in to your USB port and start using it right away. It's as simple as using a webcam! Windows, Mac and Linux operating systems automatically detect AV.io 4K, ensuring compatibility with your favorite software, including Skype, Wirecast and QuickTime.

About AV.io 4K

AV.io 4K is the latest addition to Epiphan Video's industry-leading video grabbers product line, adding 4K resolution support while maintaining support for HD and SD resolutions. To use AV.io 4K, there's no software to install; simply connect the cables and go. It works on Windows, Mac and Linux and integrates seamlessly with your favorite third-party applications such as Skype, Adobe FMLE, Wirecast, VLC media player and Quicktime.

AV.io 4K captures resolutions up to and including 4096×2160, making it the simplest way available to capture DCI 4K and 4K UHD digital signals.

For those curious as to the difference between DCI 4K and 4K UHD, these are just different definitions of a 4K resolution. 4K UHD (3840×2160) is the standard 4K resolution available on televisions and other common display screens. The 4K resolution of 4096×2160 is referred to as Digital Cinema Initiatives (DCI) 4K, and is the resolution used almost exclusively for cinema-scale film production. It is rare to find this resolution outside of a cinematic context. AV.io 4K is capable of supporting input and output at either.

Registering your AV.io 4K

Why should I register my AV.io 4K?

It will allow you to activate your product warranty, give you notifications of firmware and software updates and get you our free personalized customer support.

How to register

1. Go to epiphan.com/register
2. Provide the required information. Your six digit serial number is found on your device. A valid e-mail address is required for product registration.

Quickstart

Setting up your AV.io 4K device to capture live video and audio content couldn't be easier!

Before you begin the connection process, you will require:

- An HDMI™ (or DVI-D) video source (with or without audio)
- Your AV.io 4K device
- A capture desktop computer, laptop or notebook
- A USB 3.0 cable (included with purchase) to connect to your AV.io 4K to your capture computer
- An HDMI cable (included with purchase) to connect your video source to your AV.io 4K

Once you have these things ready to go, you can now begin the simple process of hooking up your AV.io 4K so you can start capturing!

To connect your AV.io 4K for capture:

1. Connect your AV.io 4K device to your video source
2. Connect your AV.io 4K device to your computer
3. Open your favorite third-party application, select AV.io 4K from the list of available cameras and start capturing!

And that's it! No drivers to install and no extensive set-up! Just connect the cables and you're ready to go!

Getting started

Welcome and thank you for buying Epiphan Video’s AV.io 4K!

This guide contains all the information necessary to successfully use AV.io 4K to quickly and easily capture live video content without any configuration – simply connect the cables and you’re ready to go!

This guide starts off by jumping right into it by showing you how to start capturing video, then we’ll take you through how AV.io 4K works, followed with some technical reference material, and we’ll conclude with a walkthrough of some optional video capture configuration.

Let’s get started!

What's in the box?

Your AV.io 4K product contains everything you need to easily capture live video content with minimal setup. Your purchase includes the following:

Table 1 Description of included purchase contents (for identification only, color and appearance of individual cables/adapters may vary).

<p>AV.io 4K video grabber</p>		<p>Your video capture device!</p>
<p>HDMI connector cable (1 m / 3 ft)</p>		<p>Connects a HDMI source to your AV.io 4K’s native HDMI port.</p>
<p>USB 3.0 cable (1 m / 3 ft)</p>		<p>The USB 3.0 cable connects your AV.io 4K video grabber with your computer’s USB 3.0 or 2.0 port.</p>

System requirements

System requirements are the barebones technical essentials your computer needs to work with AV.io 4K. System requirements to use AV.io 4K include:

Video source	Any VESA-compatible HDMI (or DVI-D) source.
Video capture workstation	Any computer (laptop/desktop/other format) with: <ul style="list-style-type: none"> • a compatible USB 3.0 host controller for SuperSpeed operation and 4K functionality (for maximum performance, an Intel USB 3.0 host controller is needed); or, • a USB 2.0 host controller (will limit maximum frame rate and resolution support)
Video capture workstation operating system	Windows 8.1, Windows 10 Mac OS X 10.10 and up Linux distribution with kernel 3.5.0 or higher
Processor frequency	Minimum recommended value: 2.4 GHz
RAM	Minimum recommended value: 4 GB

Technical specifications

Technical specifications for AV.io 4K are included in the table below.

Operating System support	Windows 8.1, Windows 10, Mac OS X 10.10 and up, Linux distribution with kernel 3.5.0 or higher
Drivers	Native UVC and UAC device auto-detected by OS
Input connector	HDMI
Input resolution	Standard and non-standard resolution from 640×360 up to 4096×2160 (4K DCI)
Output connector	USB 3.0 B-Type connector with USB 2.0 backward compatibility
Output scaling	Choose from: no scaling (1:1), preserve aspect ratio scaling or aspect ratio conversion scaling

Supported output resolutions		Color space YUY2 (4:2:2)	Color space NV12 (4:2:0)
	640×360	15, 23.97, 24, 25, 29.97, 30, 50, 59.94 or 60 fps	15, 23.97, 24, 25, 29.97, 30, 50, 59.94 or 60 fps
	640×480		
	960×540		
	1024×768		
	1280×720		
	1280×1024		
	1600×1200		
	1920×1080		
	3840×2160 (4K UHD)	5, 10, 15, 20 fps	15, 23.97, 24, 25, 29.97, 30 fps
4096×2160 (DCI 4K)*			
USB host controllers	When capturing 4K resolutions we recommend using a computer with an Intel USB host controller (this is the most common type) to achieve the best results. With other USB host controllers such as ASM, AMD, VIA, Renesas, Eltron, Fresco and TI, capture will be at 79% to 96% of the expected frame rate.		
HDMI audio input	Up to 96 kHz sampling rates		
Audio output	16-bit 48 kHz stereo sampling rates		
Capture latency	Near-zero. However, third-party applications may contribute capture delay		
HDCP	High-bandwidth digital content protection (HDCP) protected content cannot be captured		
LED	LED indicates the status of AV.io 4K		
Dimensions	3.54" × 2.36" × 0.91" (90 mm × 60 mm × 23 mm)		

* Note: For DCI 4K, the actual frame rate is limited to 24 fps for NV12 and 15 fps for YUY2.

Hardware

This section describes the physical features of your AV.io 4K, including diagrams and hardware feature descriptions.

Topics covered include:

- [Hardware diagrams](#); and,
- [Indicator LED details](#)

Hardware diagrams

Your AV.io 4K device includes an input, an output and an indicator light.

Input/output ports and indicator lights are identified and explained in the top and bottom cap view AV.io 4K images below. Indicator light details are explained in the proceeding section.

Top cap view:

Bottom cap view:

Indicator LED details

The color and action of the indicator LED depends on whether you are connected by USB 3.0 or USB 2.0. For maximum performance, always use a USB 3.0 port and the included USB 3.0 cable. Note that frame capture rate will be reduced when connected via USB 2.0, and it is likely that any attempt to use 4K resolutions with USB 2.0 will be unstable.

From the operating system's UVC drivers, the application will receive the AV.io 4K supported color space, resolution and frame rates. If you're not sure if your controller is USB 3.0 or USB 2.0, plug AV.io 4K into the capture computer and look at the indicator LED. After initial boot up (red LED), blue is used for USB 3.0 and green is used for USB 2.0:

Blue LED means USB 3.0

Green LED means USB 2.0

Connection type/LED color	USB 3.0 connection	USB 2.0 connection
Solid red	<ul style="list-style-type: none">Firmware update in progressAV.io 4K initializing	<ul style="list-style-type: none">Firmware update in progressAV.io 4K initializing
Solid green	-	USB 2.0 connection active
Blinking green	-	Video and/or audio transferring successfully
Solid blue	USB 3.0 connection active	-
Blinking blue	Video and/or audio transferring successfully	-

Capture

Setting up your AV.io 4K device to capture live video content couldn't be easier!

Before you begin the connection process, you will require:

- An HDMI (or DVI-D) video source
- Your AV.io 4K device
- A capture computer, laptop or notebook
- A USB 3.0 cable (included with purchase) to connect to your AV.io 4K to your capture computer
- An HDMI cable (included with purchase) to connect your video source to your AV.io 4K

Once you have these things ready to go, you can now begin the simple process of hooking up your AV.io 4K so you can start capturing!

How AV.io 4K works

Once you're ready to start capturing, you'll need either a built-in or third-party application to capture video and audio content with AV.io 4K.

The application communicates with AV.io 4K and negotiates a **color format** (the range of available colors), **frame rate** (frequency at which frames in a video sequence are displayed) and **frame resolution** (size of a single video frame in pixels). Higher frame rate means smoother video capture while resolution determines the aspect ratio of the video output as well as its resolution and degree of definition.

With the help of AV.io 4K, the content from your video source is automatically configured and captured on your computer through your selected application. If the application requests a frame size that is smaller or larger than your video source, AV.io 4K automatically scales the video for you. For consistent and widely compatible output, audio is automatically resampled to 16-bit 48 kHz stereo audio.

No configuration required!

Set up your AV.io 4K for capture

Connecting your AV.io 4K to your capture computer is simple and is accomplished in three easy steps.

To connect your AV.io 4K for capture:

1. Connect your AV.io 4K device to your video source
2. Connect your AV.io 4K device to your desktop computer, laptop or notebook
3. Open your favorite third-party application, select AV.io 4K from the list of available input sources and start capturing!

And that's it! No drivers to install and no extensive set-up! Just connect the cables and you're ready to go!

Resolutions, capture rates and aspect ratios

The **resolution** (also known as frame size or display mode) of a video signal, digital image, TV screen, computer monitor or other display device is a count of the number of pixels displayed horizontally and vertically. For example the resolution 1920×1080 (which is 1080p) creates an image that is 1920 pixels wide and 1080 pixels tall.

The **aspect ratio** of an image describes the proportional relationship between its pixel width and height. The resolution 1920×1080 (1080p) is quite a bit wider than it is tall. The ratio of its width to height is 16 to 9, represented as an aspect ratio 16:9.

AV.io 4K outputs resolutions in commonly supported aspects ratios. The table below is a color-coded legend for interpreting the two tables of product resolutions below it:

Aspect Ratio	Common Use
4:3	Standard TV (NTSC/PAL) display and non-widescreen computer displays
16:9	Widescreen (HD) TV displays (1080p, 1080i, 720p etc), and 4K-capable displays
16:10 (8:5)	Widescreen computer displays, and 4K-capable displays
5:4	Sometimes used in larger format computer monitors
1.90:1	Digital Cinema Initiatives standard resolution for 4K or 2K video projection

AV.io 4K accepts the following inputs by default:

640×480	1024×768	1280×720	1280×800
1280×1024	1440×900	1600×1200	1920×1080
1920×1200	2048×1080	3840×2160	4096×2160

If you're using an input resolution that is not on this list, it might still be possible to capture. However, the video might be stretched, or scaled to a different size and surrounded by black letter-boxing, based on the software and your configuration settings. Read [Configure settings using AV.io Config tool](#) for more detail.

AV.io 4K generates a list of the following possible resolutions for your capture application to select for output display:

640×360	640×480	960×540	1024×768
---------	---------	---------	----------

1280×720	1280×1024	1600×1200	1920×1080
3840×2160	4096×2160		

Captured video content is output to your application, depending on your resolution and color space, at **5, 10, 15, 20, 23.97, 24, 25, 29.97, 30, 50, 59.94 or 60 frames per second** (your application chooses one of these frame rates) when captured over USB 3.0.

When capturing 4K resolutions we recommend using a computer with an Intel USB host controller (this is the most common type) to achieve the best results. With other USB host controllers such as ASM, AMD, VIA, Renesas, Eltron, Fresco and TI, capture will be at 79% to 96% of the expected frame rate.

Automatic image scaling & audio resampling

If your source content is larger or smaller than the frame size chosen by the application, AV.io 4K automatically **scales your source** to match the desired frame size! No user configuration required!

AV.io 4K also automatically performs **audio resampling**, meaning that no matter the bit depth or frequency of audio through an HDMI audio source, AV.io 4K automatically resamples your audio so that your application gets a consistent audio sample rate and bit depth, even if you change the video source!

Third-party applications

AV.io 4K uses pre-installed drivers on your OS (called **UVC drivers** and **UAC drivers**) to communicate with third-party applications and capture content. Due to AV.io 4K's use of UVC/UAC technology, there is no need for driver installation. Just like a webcam, your AV.io 4K device is immediately recognized as a camera device (like a web cam) and can be used to capture content via any UVC-compatible third-party application.

Third-party applications that work with AV.io 4K include, but are not limited to the following list. Try your favorite capture application!

Zero-install applications (included with your OS)		
 Skype (with Windows 8.1 and Windows 10)	 Windows Camera app (with Windows 8.1 and Windows 10)	 QuickTime (with Mac OS X)

Popular applications available for download		
 Skype	 Wirecast	 QuickTime
 Adobe FMLE	 VLC media player	

Configuration options

Your AV.io 4K device is ready to use right out of the box; however, there is support for additional configuration should you need it.

Firmware updates and changes to default capture settings can be applied to your AV.io 4K using Epiphan's AV.io Config tool.

Detailed instructions on how to use AV.io Config can be found using the links below:

- [Install the AV.io Config tool](#)
- [Configure settings using AV.io Config tool](#)
- [Update firmware using the AV.io Config tool](#)
- [Identify input details using the AV.io Config tool](#)

The AV.io Config tool allows you to change several settings to make changes to your video capture experience if necessary. Most users won't need to use this utility for anything other than firmware updates, but advanced users may find these tweaks help them get the most out of their AV.io 4K.

These settings include:

- **input signal resolution**
- **aspect ratio preservation**
- **performance mode**

Input signal resolution (disabled by default)

When enabled, your AV.io 4K adds the exact resolution of your input signal to the list of supported output resolutions. This provides the ability to capture non-standard frame sizes 1:1 if required. However it is important to note that the capture resolution is still dictated by the third-party application and this application can override any AV.io 4K custom capture settings. Also note that in selecting this mode, any change in input signal (programmatically or by connecting a different input) causes AV.io 4K to renegotiate its resolution with the application. This can cause an interruption in the captured stream.

Preserve aspect ratio (enabled by default)

When enabled, your AV.io 4K preserves the aspect ratio of your input signal by adding black bars to the sides or top and bottom of the frame (only for cases when the application using the signal requests a frame size

with a different aspect ratio). For example, with this option enabled, a 4:3 input signal gets black bars added to the sides of the image when viewed in an application that requests a 16:9 aspect ratio. With this option disabled, the 4:3 image is instead stretched to fit the full 16:9 size.

Performance mode (enabled by default)

When enabled, your AV.io 4K enters and exits system suspend mode (i.e. sleep) faster by disabling support for the Suspend/U3 USB power state. This means AV.io 4K starts working again faster after your computer wakes from a system suspend state, at the cost of increased power consumption. Disabling this setting is ideal in situations where power consumption needs to be monitored, such as battery preservation in laptops.

Audio selector for multichannel inputs

Not applicable to AV.io 4K.

Now that you've learned what these configuration settings do, you may want to [Configure settings using AV.io Config tool](#) or [Update firmware using the AV.io Config tool](#).

Install the AV.io Config tool

Epiphan's AV.io Config tool is used for loading firmware updates on your AV.io 4K and for advanced settings changes.

You may install AV.io Config on the same computer(s) where you use AV.io 4K, or only on one computer for configuration. All firmware updates and settings changes are saved to the device and work without any software installed on the computer.

To install the AV.io Config tool, follow the directions below for your computer's operating system.

Windows

1. Download the AV.io Config package under the **Windows** heading on the AV.io 4K Downloads page on Epiphan's web site.
<http://www.epiphan.com/support/avio-4k-drivers-documentation/>
2. Extract all the files from the zip file (remember the location you're unzipping to).
3. Browse to the unzip folder and open the AV.io Config tool by double-clicking on **AVioConfig.exe**. (Depending on your local security settings, you may need to right-click and choose to run the file as an administrator).
4. AV.io Config starts! If your video grabber is connected to the computer by USB, it is detected.

Mac

1. Download the AV.io Config package under the **Mac OS X** heading on the AV.io 4K Downloads page on Epiphan's web site.

<http://www.epiphan.com/support/avio-4k-drivers-documentation/>

2. Double-click the downloaded file to open the disk image package.

3. If desired, drag the AVioConfig application to your desktop or another location where you will find it for future use.
4. Double-click the AVioConfig application icon to launch AV.io Config; a warning box appears.

5. Click **Open**.
6. AV.io Config starts! If you video grabber is connected to the computer by USB, it is detected.

Linux

1. Download the AV.io Config package under the **Linux** heading on the AV.io 4K Downloads page on Epiphan's web site.
<http://www.epiphan.com/support/avio-4k-drivers-documentation/>
2. Untar and unzip the contents of the .tar.bz2 file (tar -xjvf can be used to untar and unzip in one command).
3. Browse (or change directories) to the unzip folder.
4. Either: Double-click the AV.io Config application icon or execute the AV.io Config application from the command line to launch AV.io Config (./AVioConfig).
5. AV.io Config starts! If you video grabber is connected to the computer by USB, it is detected.

Configure settings using AV.io Config tool

Epiphan's AV.io Config tool gives advanced users the ability to change several settings to their video capture experience. The settings that can be changed include: Re-numerate input signal resolution, aspect ratio preservation and performance mode. See [Configuration options](#) for more details.

To change the configurable settings with the AV.io Config tool:

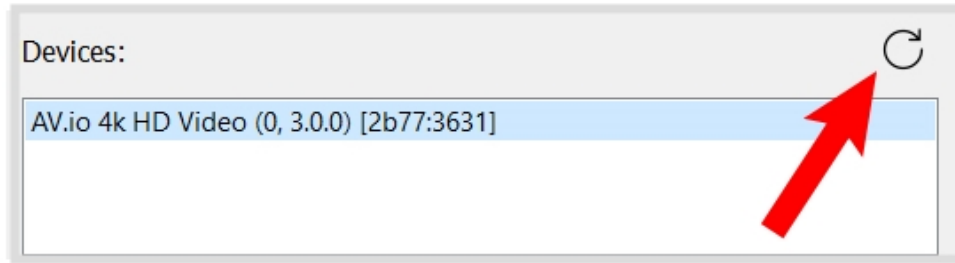

1. If needed, install the AV.io Config tool. For details specific to your OS, see [Install the AV.io Config tool](#).
2. Connect your AV.io 4K device to your computer, laptop or notebook.
3. Open the AV.io Config tool.

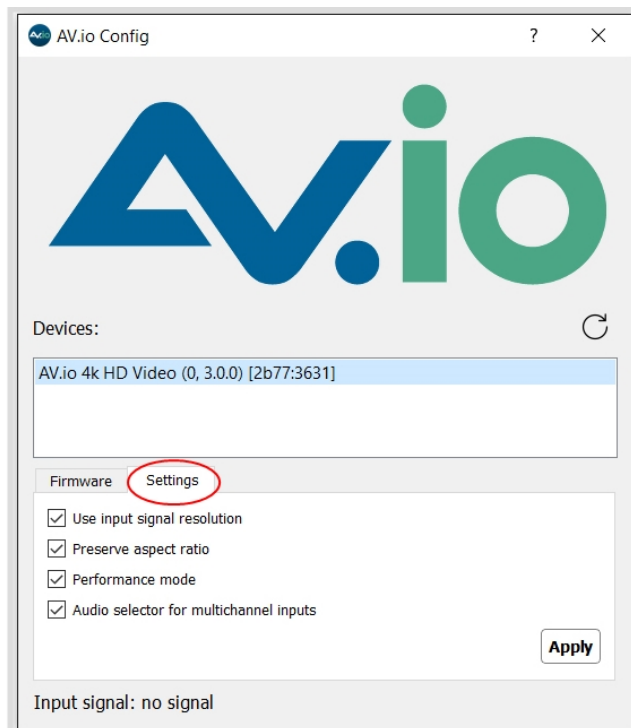

4. Select your AV.io 4K device from the list under the Devices heading.

If your video grabber is not displayed, press the Refresh icon to refresh the list of connected devices.

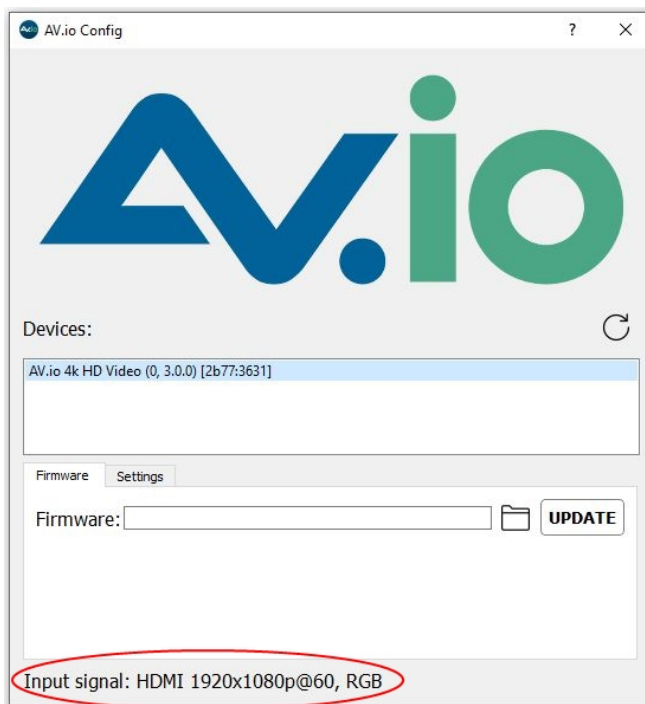

5. Click the **Settings** tab; the settings page appears.

6. Enable or disable the individual settings by clicking each checkbox according to your needs. See [Configuration options](#) for a description of each setting.

Identifying the input resolution on your AV.io 4K

The AV.io Config tool can help you figure out exactly what information your video source is sending. Plug in the source and select your device. The UI detects information about the source and presents it at the bottom of the window.

The line tells you what connector the video source is using (in this case, HDMI), the exact resolution of the source (1920×1080p), the frame rate the source is outputting (60 fps) and the color model (RGB).

Update firmware using the AV.io Config tool

From time-to-time Epiphan Video releases firmware updates for our video grabbers. If you [register your product](#) and agree to be notified of product updates, you'll receive an email when there is an AV.io 4K update available for download.

When new firmware is available, you can load this firmware onto your AV.io 4K using the AV.io Config tool and the steps below.

Attempting to update firmware while running virtual machines will result in firmware upgrade failure.

To update firmware using the AV.io Config tool:

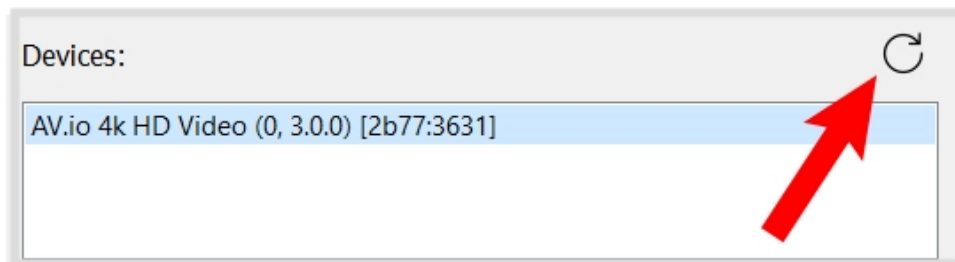

1. If you haven't already done so, download and install the AV.io Config tool. See [Install the AV.io Config tool](#).
2. Download the firmware update file from the Epiphan website, as described in your firmware update notification email or discussion with your vendor.
3. Connect your AV.io 4K device to your computer, laptop or notebook.
4. Open the AV.io Config tool.

5. Select your AV.io 4K device from the list under the Devices heading.

If your AV.io 4K device is not displayed, press the Refresh icon to refresh the list of connected devices.

6. Using the diagram below, check the current firmware version of your AV.io 4K. If it is the same version as the new firmware you downloaded, there is no need to do the firmware update.

7. Click the **Firmware** tab

8. Click the **folder icon** to navigate to the saved location of the firmware, and click **Update** to update your video grabber to the selected firmware; an update bar appears and displays the progress of the update.

Do not disconnect your AV.io 4K at any point during the update process! Doing so may cause irrevocable errors and/or permanently damage the device.

9. When the update is finished the progress bar turns green and displays "Update Completed" (Note the firmware update will not be automatically reflected in the Devices list unless the **Refresh** icon is clicked). You may now safely disconnect your AV.io 4K if needed.

When updating firmware on a Mac, the “Update Completed” text will not be displayed. The firmware upgrade is complete when the progress bar fills the width of the AV.io Config window and the window contents are no longer greyed out.

Limitations and known issues

This section includes known issues or limitations that affect functionality or usability and ways that you can work around these limitations.

Affecting all operating systems

- When capturing from a source with a 23.98p, 29.97p or 59.94i signal, frame rate occasionally dips before returning to its original capture rate.
 - **Workaround:** Set your source frame rate to a different value, such as 30 or 60 fps.

Affecting Windows

- Windows 7/8.1: The AV.io Config tool may display the AV.io 4K device more than once in the device list possibly causing user confusion.
 - **Workaround:** Simply press the refresh icon to refresh the device list; only one AV.io 4K device is displayed.
- Windows 8.1: On rare occasions (< 5% of the time), captured video has a small vertical fluctuation (of a few pixels) or small artifacts in the lower right quadrant of the screen. This is noticeable right from the beginning of capture.
 - **Workaround:** Start capturing a few moments before your recording or streaming event and check vertical position and the lower right quadrant of the captured image. If any issues are noticed, disconnect and re-connect AV.io 4K's USB 3.0 cable to the capture computer.

Affecting Ubuntu

- Ubuntu 14.04 LTS: With the exception of the first capture after system reboot, the very first captured frame is always green.
 - **Workaround:** Remove the green frame in post-production editing. If streaming the captured video, begin streaming after the initial green frame has already been captured.

Troubleshooting

Use the follow table for help if you are experiencing problems or unexpected behavior from your AV.io 4K.

Affecting all operating systems

Symptom(s)	Action(s) to resolve
Frame rates lower than 30 fps at 4K resolutions	<p>1) Optimize performance by using an Intel USB host controller.</p> <p>2) Use your application to change the color space you are using. At 4K resolutions, NV12 (4:2:0) is available at 15, 23.97, 24, 25, 29.97, or 30 fps, and YUY2 (4:2:2) is available at 5, 10, 15, or 20 fps.</p>

Affecting Windows

Symptom(s)	Action(s) to resolve
Incorrect input resolutions detected	If using Windows 8.1 or 10 with VLC Media Player 2.2.1 , downgrade to an earlier version of VLC or use a different capture application, such as Adobe FMLE.
Audio artifacts are present (popping, missing audio, poorly encoded audio, etc).	<p>If using Windows 8.1 or 10 with VLC Media Player 2.2.1, downgrade to an earlier version of VLC or use a different capture application, such as Adobe FMLE.</p> <p>OR</p> <p>If using Windows 8.1 or 10 with Skype for Business, use a different capture application, such as Adobe FMLE.</p>
Captured video file displays black screen when opened.	If capturing on Windows 8.1 using Windows Movie Maker with your AV.io 4K connected to an Etron EJ188H USB 3.0/2/0 host controller , switch to a different capture application, connect to a different USB port, or upgrade to Windows 10.

Recorded file does not have audio.	If capturing on Windows 8.1 using Windows Camera with your AV.io 4K connected to a Texas Instruments TSub USB 3.0 controller , switch to a different capture application (such as VLC Media Player) or upgrade to Windows 10.
Firmware update fails	If updating on a computer running Windows 8.1 or 10 with your AV.io 4K connected to an Etron 3.0 host controller , perform the firmware update on another computer (without an Etron USB host controller) or using another USB port on the same computer. Note that USB 2.0 can be used for firmware updates.

Affecting Mac

Symptom(s)	Action(s) to resolve
AV.io 4K is specified as the capture device in the application, but capture occurs using a different device connected to the computer (such as a web cam).	If using VLC Media Player 2.2.1 , disconnect all capture devices except AV.io 4K, downgrade to an older version of VLC media player or use a different capture application.
Recorded file does not have audio.	If using VLC Media Player 2.2.1 , downgrade to an earlier version or use a different capture application, such as Quicktime.
Video doesn't update (appears frozen) when using AV.io 4K as the video source for Skype video calls.	Disconnect and reconnect AV.io 4K. If the problem persists, use a different capture computer. This problem appears to happen with regular web cams as well.

Affecting Ubuntu

Symptom(s)	Action(s) to resolve
Video cannot be resumed if stopped during a Skype call.	If capturing on Ubuntu 14.04 LTS with your AV.io 4K connected to an Etron EJ168A USB 3.0 controller , switch to a different USB port or simply avoid stopping the Skype call. If it is not possible to stop the Skype call or if it stops accidentally, disconnect and reconnect the

	device. You may need to restart the video call.
Video capture fails when the capture computer recovers from sleep mode, even if capture was stopped prior to sleep mode	If capturing on Ubuntu 15.04 with your AV.io 4K connected to a Texas Instruments TUSB7320 USB 3.0 host controller , switch to a different USB port or simply disconnect and re-connect AV.io 4K's USB 3.0 cable to the capture computer.

Affecting Chromebook

Symptom(s)	Action(s) to resolve
AV.io 4K is not detected as a valid audio device.	If capturing using Chromebook Apps Clipchamp and WebRTC on Google Chrome OS v43.0.2357.125 (64 bit) , use a different Chromebook app to capture both video and audio, such as Screencastify or MediaCore Capture.

Software and documentation license

ATTENTION: THE SOFTWARE AND DOCUMENTATION PROVIDED UNDER THIS AGREEMENT ARE BEING LICENSED TO YOU BY EPIPHAN SYSTEMS INC. ("LICENSOR") AND ARE NOT BEING SOLD. THIS AGREEMENT CONTAINS LIMITATIONS ON REPRESENTATIONS, WARRANTIES, CONDITIONS, REMEDIES, AND LIABILITIES THAT ARE APPLICABLE TO THE SOFTWARE AND DOCUMENTATION.

Epiphan Systems Inc. Software License

IMPORTANT: BEFORE DOWNLOADING, INSTALLING, OR USING THE SOFTWARE AND DOCUMENTATION, PLEASE CAREFULLY READ THIS AGREEMENT WHICH CONTAINS THE TERMS AND CONDITIONS UNDER WHICH YOU ARE ACQUIRING A LICENSE TO USE THE SOFTWARE AND DOCUMENTATION. IF YOU DO NOT ACCEPT THE TERMS AND CONDITIONS OF THIS AGREEMENT PLEASE DO NOT DOWNLOAD, INSTALL, OR USE THE SOFTWARE AND DOCUMENTATION AND PROMPTLY RETURN OR DESTROY THE SOFTWARE AND DOCUMENTATION. IF YOU DOWNLOAD, INSTALL, OR USE THE SOFTWARE AND/OR DOCUMENTATION, YOU WILL HAVE ACCEPTED AND AGREED TO THESE TERMS AND CONDITIONS. THE SOFTWARE AND DOCUMENTATION ARE ALSO PROTECTED BY COPYRIGHT LAWS AND INTERNATIONAL COPYRIGHT TREATIES, AS WELL AS OTHER INTELLECTUAL PROPERTY LAWS. IF YOU ARE AN AGENT OR EMPLOYEE OF AN ENTITY, YOU REPRESENT AND WARRANT THAT (I) THE INDIVIDUAL ACCEPTING THIS AGREEMENT IS DULY AUTHORIZED TO ACCEPT THIS AGREEMENT ON SUCH ENTITY'S BEHALF AND TO BIND SUCH ENTITY, AND (II) SUCH ENTITY HAS FULL POWER, CORPORATE OR OTHERWISE, TO ENTER INTO THIS AGREEMENT AND PERFORM ITS OBLIGATIONS UNDER THIS AGREEMENT.

1. Definitions: In this Agreement:

"Agreement" means this Epiphan Software License;

"Documentation" means the technical publications delivered to You with the Software relating to the installation and operation of the Software, such as reference, user, installation and technical guides and release notes;

"Epiphan" means Epiphan Systems Inc.;

"Software" means the Licensor binary and/or bytecode software programs that (i) are made available to You for download after acceptance of this Agreement, (ii) are packaged with this Agreement, or (iii) pre-installed on Epiphan products, or (iv) embed this Agreement in their installer(s) and which are installed after acceptance of this Agreement, and which binary and/or bytecode software programs include any Documentation; and

"You" or "Your" means the individual acquiring the Software license or any entity on whose behalf such individual is acting. In the case of an entity, "You" includes any entity that by majority voting interest controls, is controlled by, or is under common control with You.

2. Grant of Software License: Subject to the terms and conditions of this Agreement, Licensor grants You a non-exclusive, non-transferable, non-sublicensable, internal license to use a reasonable number of copies of the Software. All copies of the Software made by You shall include all trademarks, copyright notices, restricted rights legends, proprietary markings and the like exactly as they appear on the copy of the Software originally provided to You. No other rights in the Software or Documentation are granted to You.

3. Open Source Software: Binary, bytecode and source code versions of certain open source software packages may be embedded in or distributed with the Software (“Open Source Software”). If a separate license agreement for an item of open source software is: delivered to You with the Software; included in the download package for the Software; referenced in any material (including the Documentation) that is included in the download or distribution package for the Software; or listed at www.epiphan.com/opensource, then such open source software shall be Open Source Software and such separate license agreement shall govern Your use of that item or version of such open source software. The Open Source Software may include free software (i.e. software licensed under the GNU Lesser General Public License or other free software licenses) for which the applicable free software license may also require that the source code for such free software be made available to those receiving only executable versions of such free software. If the source code for any free software distributed with the Software is not provided with the Software, then upon request, within a three (3) year period from the original receipt of such Open Source Software from Licensor, for a fee that shall not exceed Licensor’s costs associated with the shipping of the source code for such free software, Licensor will provide a copy of the source code for such free software to You.

4. Restrictions: The terms set forth in this Section 4 shall constitute conditions to the licenses granted in Section 2. You shall not reverse engineer, disassemble, reverse translate, decompile or in any other manner decode the Software except to the extent the Software is distributed with any Open Source Software that prohibits the imposition of such a restriction or to the extent the foregoing restriction is expressly prohibited by applicable law notwithstanding a contractual obligation to the contrary. You acknowledge and agree that no rights in respect to the source code of the Software are granted to You. You acknowledge and agree that the rights in respect to use of the Software and Documentation are granted only for use in conjunction with Epiphan hardware. You shall not distribute, lease, rent, grant a security interest in, assign, or otherwise transfer the Software except as expressly provided in this Agreement. You shall not modify or create any derivatives works of the Software or merge all or any part of the Software with another program. You shall not use the Software or make the Software available to any third parties as part of any service bureau, time sharing service, application service provider offering, software-as-a-service offering or any other managed service offering. You shall not disclose any performance, benchmarking, or feature-related information about the Software. You further agree not to disclose, transfer or otherwise provide to any third party any portion of the Software, except as expressly permitted herein.

5. Disclaimer of Warranties: Licensor does not make any representations or provide any warranties or conditions in respect to the Software. **EXCEPT FOR ANY WARRANTIES THAT MAY BE PROVIDED IN ANY COMMERCIAL AGREEMENT BETWEEN YOU AND LICENSOR, THE SOFTWARE AND DOCUMENTATION ARE PROVIDED “AS IS”, WITHOUT ANY REPRESENTATIONS, CONDITIONS, OR WARRANTIES OF ANY KIND. WITHOUT LIMITATION, LICENSOR AND ITS LICENSORS, SUPPLIERS, SUBCONTRACTORS AND DISTRIBUTORS DISCLAIM ANY EXPRESS OR IMPLIED REPRESENTATIONS, CONDITIONS, AND/OR WARRANTIES OF MERCHANTABILITY, MERCHANTABILITY, NON-INFRINGEMENT, DURABILITY, TITLE, SATISFACTORY QUALITY, OR FITNESS FOR A PARTICULAR PURPOSE WHETHER ARISING BY STATUTE, COURSE OF DEALING, USAGE OF TRADE, OR OTHERWISE. EXCEPT AS OTHERWISE EXPRESSLY PROVIDED IN ANY COMMERCIAL AGREEMENT, THE ENTIRE RISK OF THE USE OF THE SOFTWARE AND DOCUMENTATION SHALL BE BORNE BY YOU. EXCEPT AS OTHERWISE EXPRESSLY PROVIDED IN ANY COMMERCIAL AGREEMENT, NEITHER LICENSOR NOR ANY OF ITS LICENSORS, SUPPLIERS, SUBCONTRACTORS AND/OR DISTRIBUTORS MAKE ANY REPRESENTATIONS OR PROVIDE ANY CONDITIONS AND/OR WARRANTIES ABOUT THE SUITABILITY OF THE SOFTWARE AND/OR DOCUMENTATION OR ABOUT ANY INFORMATION AND/OR DATA THAT MAY BE PROCESSED BY OR MADE AVAILABLE USING THE SOFTWARE.**

6. LIMITATION OF LIABILITY: NEITHER LICENSOR NOR ANY OF ITS LICENSORS, SUPPLIERS, SUBCONTRACTORS AND/OR DISTRIBUTORS SHALL HAVE ANY LIABILITY TO YOU OR ANY OTHER PERSON OR ENTITY FOR ANY DAMAGES ARISING FROM THIS AGREEMENT, RELATING TO THE SOFTWARE OR DOCUMENTATION, OR RELATING TO ANY SERVICES PROVIDED TO YOU BY LICENSOR (INCLUDING ITS LICENSORS, SUPPLIERS, SUBCONTRACTORS AND/OR DISTRIBUTORS) IN RELATION TO THE SOFTWARE AND/OR DOCUMENTATION FOR ANY INDIRECT, RELIANCE, INCIDENTAL, SPECIAL, PUNITIVE, EXEMPLARY OR CONSEQUENTIAL DAMAGES, INCLUDING, BUT NOT LIMITED TO, LOSS OF REVENUE OR PROFIT, LOSS OF OR DAMAGE TO DATA, BUSINESS INTERRUPTION, LOSS OF DATA, REPLACEMENT OR RECOVERY COSTS, OR OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER ARISING FROM CONTRACT, EQUITY, TORT (INCLUDING NEGLIGENCE OR STRICT LIABILITY) OR ANY OTHER THEORY OF LIABILITY, EVEN IF LICENSOR (INCLUDING ITS LICENSORS, SUPPLIERS, SUBCONTRACTORS AND DISTRIBUTORS) HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, OR THEY ARE FORESEEABLE. THE LIMITATIONS IN THIS SECTION SHALL APPLY WHETHER OR NOT THE ALLEGED BREACH OR DEFAULT IS A BREACH OF A FUNDAMENTAL CONDITION OR TERM OR FUNDAMENTAL BREACH. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES, SO THESE LIMITATIONS MAY NOT APPLY TO YOU. IN NO EVENT SHALL THE TOTAL CUMULATIVE LIABILITY OF LICENSOR (INCLUDING ITS LICENSORS, SUPPLIERS, SUBCONTRACTORS AND DISTRIBUTORS) TO YOU OR ANY OTHER PERSON OR ENTITY FOR ANY DAMAGES ARISING FROM THIS AGREEMENT, RELATING TO THE SOFTWARE, DOCUMENTATION AND/OR RELATING TO ANY SERVICES PROVIDED TO YOU BY LICENSOR (INCLUDING ITS LICENSORS, SUPPLIERS, SUBCONTRACTORS AND DISTRIBUTORS) IN RELATION TO THE SOFTWARE AND/OR DOCUMENTATION, EXCEED THE LICENSE FEES PAID BY YOU FOR THE SOFTWARE.

THE DISCLAIMER OF REPRESENTATIONS, WARRANTIES AND CONDITIONS AND LIMITATION OF LIABILITY CONSTITUTE AN ESSENTIAL PART OF THIS AGREEMENT. YOU ACKNOWLEDGE THAT BUT FOR THE DISCLAIMER OF REPRESENTATIONS, WARRANTIES AND CONDITIONS AND LIMITATION OF LIABILITY, NEITHER LICENSOR NOR ANY OF ITS LICENSORS OR SUPPLIERS WOULD GRANT THE RIGHTS GRANTED IN THIS AGREEMENT.

7. Term and Termination: This Agreement shall continue for as long as You use the Software, however, it may be terminated sooner as provided in this Section 7. You may terminate this Agreement by destroying all copies of the Software and Documentation under Your control and providing certification of such destruction to Licensor or by returning the Software to Licensor. Licensor may terminate this Agreement immediately by providing You with written notice if: (a) You are in material breach of any provision of this Agreement, which breach, if capable of being cured, is not cured within thirty (30) days after Licensor gives You written notice thereof; or (b) You have committed a non-curable material breach of this Agreement. Upon termination You shall destroy all copies of the Software. In addition to this Section, the Sections entitled Definitions, Disclaimer of Warranties, Limitation of Liability, Title, High-Risk Activities, Intellectual Property, and General shall continue in force even after any termination of this Agreement. No termination of this Agreement will entitle You to a refund of any amounts paid by You to Licensor or affect any obligations You may have to pay any outstanding amounts owing to Licensor. Upon any termination by Licensor, You shall destroy all copies of the Software and Documentation under Your control and certify such destruction to Licensor.

8. Support and Updates: This Agreement does not grant You the right to any updates or enhancements of the Software or the right to receive any technical support for the Software. Such updates and other technical support services, if available, may be purchased separately from Licensor. Use of any updates or

enhancements to the Software provided pursuant to any technical support You may procure from Licensor shall be governed by the terms and conditions of this Agreement. Licensor reserves the right at any time not to release or to discontinue the release of any Software and to alter prices, features, specifications, capabilities, functions, licensing terms, release dates, general availability or other characteristics of the Software.

9. Title: All right, title, and interest (including all intellectual property rights) in, to, and under the Software (including all copies thereof) shall remain with Licensor and its licensors.

10. High-Risk Activities: The Software is not fault-tolerant and is not designed, manufactured or intended for use in or in conjunction with on-line control equipment in hazardous environments requiring fail-safe performance, such as in the operation of nuclear facilities, aircraft navigation systems, air traffic control, or direct life support machines. Licensor, its licensors, suppliers, subcontractors and distributors specifically disclaim any express or implied representations, warranties and/or conditions for such uses.

11. U.S. Government End-Users: The Software and Documentation are each a "commercial item" as that term is defined at FAR 2.101, consisting of "commercial computer software" and "commercial computer software documentation" as such terms are defined in FAR 12.212, and are provided to the U.S. Government only as commercial end items. Government end users acquire the rights set out in this Agreement for the Software and Documentation consistent with: (i) for acquisition by or on behalf of civilian agencies, the terms set forth in FAR 12.212; or (ii) for acquisition by or on behalf of units of the Department of Defense, the terms set forth in DFARS 227.7202. Use of the Software and Documentation is further restricted by the terms and conditions of this Agreement. For the purposes of any applicable government use, the Software and Documentation were developed exclusively at private expense, and are trade secrets of Epiphan Systems Inc. for the purpose of any Freedom of Information legislation or any other disclosure statute, regulation or provision.

12. Export Restrictions: The Software, Documentation and related information are subject to export and import restrictions. By downloading, installing, or using the Software, Documentation and/or related information, You are representing and warranting that You are not located in, are not under the control of, and are not a national or resident of any country to which the export of the Software, Documentation and/or related information would be prohibited by the laws and/or regulations of Canada or the United States. You are also representing and warranting that You are not an individual to whom the export of the Software, Documentation or related information would be prohibited by the laws and/or regulations of Canada or the United States. You shall comply with the export laws and regulations of Canada and the United States that are applicable to the Software, Documentation and related information and You shall also comply with any local laws and/or regulations in Your jurisdiction that may impact Your right to export, import, or use the Software, Documentation or related information, and You represent and warrant that You have complied with any such applicable laws and/or regulations. The Software, Documentation and related information shall not be used for any purposes prohibited by export laws and/or regulations, including, without limitation, nuclear, chemical, or biological weapons proliferation. You shall be responsible for procuring all required permissions for any subsequent export, import, or use of the Software, Documentation or related information.

13. Intellectual Property: Epiphan is a trademark or a registered trademark of Epiphan Systems Inc. in certain countries. All Licensor product names and logos are trademarks or registered trademarks of Epiphan Systems Inc. in certain countries. All other company and product names and logos are trademarks or registered trademarks of their respective owners in certain countries. You shall not disclose, transfer or

otherwise provide to any third party any portion of the Software, except as expressly permitted in this Agreement.

14. General: This Agreement is the entire agreement between You and Licensor in respect to the Software, superseding any other agreements or discussions, oral or written. The terms and conditions of this Agreement shall prevail over any pre-printed terms on any quotes, orders, purchase orders, or purchase order acknowledgements, and shall prevail over any other communications between the parties in relation to the Software. You may not assign this Agreement whether voluntarily, by operation of law, or otherwise without Licensor's prior written consent. Licensor may assign this Agreement at any time without notice. The failure of a party to claim a breach of any term of this Agreement shall not constitute a waiver of such breach or the right of such party to enforce any subsequent breach of such term. If any provision of this Agreement is held to be unenforceable or illegal, such decision shall not affect the validity or enforceability of such provisions under other circumstances or the remaining provisions of this Agreement and such remaining provisions shall be reformed only to the extent necessary to make them enforceable under such circumstances. This Agreement shall be governed by the laws of the Province of Ontario and the laws of Canada applicable therein. No choice or conflict of laws rules of any jurisdiction shall apply to this Agreement. You shall only be entitled to bring any action or proceeding arising out of or relating to this Agreement, the Software, Documentation or any services provided in respect to the Software and/or Documentation in a court in Ottawa, Ontario, Canada, and You consent to the jurisdiction of such courts for any such action or proceeding. You waive all rights that You may have or that may hereafter arise to contest the jurisdiction of such courts for any action or proceeding brought by You. You hereby waive any right. You may have to request a jury trial with respect to any action brought by You in connection with this Agreement, the Software or any services provided in respect to the Software. The application of the United Nations Convention on Contracts for the International Sale of Goods to this Agreement is expressly excluded.

Environmental Information

The equipment that you bought has required the extraction and use of natural resources for its production. It may contain hazardous substances that could impact health and the environment. In order to avoid the dissemination of those substances in our environment and to diminish the pressure on the natural resources, we encourage you to use the appropriate take-back systems. Those systems will reuse or recycle most of the materials of your end life equipment in a sound way. The crossed-out wheeled bin symbol invites you to use those systems. If you need more information about collection, reuse and recycling systems, please contact your local or regional waste administration. You can also contact us for more information on the environmental performance of our products.

Important Safety Warnings

WARNING: This product has no user-serviceable parts and the battery used in this device is not replaceable. Do not attempt to disassemble. Return the device for service.

CAUTION, RISK OF ELECTRIC SHOCK: This device may have multiple AC power cords installed. All power sources shall be disconnected before servicing to avoid shock hazard.

ATTENTION: Cet appareil ne contient aucun composant pouvant être entretenu ou réparé par l'utilisateur. En cas de panne, retourner l'appareil pour réparation.

ATTENTION, RISQUE DE CHOC ÉLECTRIQUE: Cet appareil peut être équipé de multiples cordons d'alimentation en courant alternatif. Pour placer cet appareil hors tension, débrancher tous les cordons d'alimentation sans exception.

FCC & CE Compliance Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference
2. This device must accept any interference received, including interference that may cause undesired operation.

Marking by the symbol **CE** indicates compliance of this device with EMC directive of the European Community and meets or exceeds the following technical standard.

EN 55022 - Limits and Methods of Measurement of Radio Interference Characteristics of Information Technology Equipment.

Other Jurisdictional Issues

Epiphan makes no representation that its products or information in this document or its web site is appropriate or available for use in your jurisdiction. Those who choose to access the Epiphan web site or use Epiphan products do so on their own initiative and are responsible for compliance with local laws, if and to the extent local laws are applicable

Submissions to Epiphan and Affiliated Servers

Any information, including but not limited to remarks, suggestions, ideas, graphics, or other submissions, communicated to Epiphan through their Epiphan web site is the exclusive property of Epiphan. Epiphan is entitled to use any information submitted for any purpose, without restriction (except as stated in Epiphan's Privacy Statement) or compensation to the person sending the submission. The user acknowledges the originality of any submission communicated to Epiphan and accepts responsibility for its accuracy, appropriateness, and legality.

Third Parties and Links to Third-Party Web Sites

Mention of non-Epiphan Systems Inc. products or services on their website, or this document site is for informational purposes and does not constitute an endorsement or recommendation.

This document may contain links to non-Epiphan web sites. These links are provided to you as a convenience, and Epiphan is not responsible for the content of any linked web site. Any outside web site accessed from the Epiphan web site is independent from Epiphan, and Epiphan has no control over the content of that web site. In addition, a link to any non-Epiphan web site does not imply that Epiphan endorses or accepts any responsibility for the content or use of such a web site.

In no event shall any reference to any third party or third party product or service be construed as an approval or endorsement by Epiphan of that third party or of any product or service provided by a third party.

Miscellaneous

It is the user's responsibility to ascertain whether any information downloaded from the Epiphan web site or other websites is free of viruses, worms, trojan horses, or other items of a potentially destructive nature.

Enforcement of Terms and Conditions

These Terms and Conditions for use of this document and the associated Epiphan Product are governed and interpreted pursuant to the laws of the province of Ontario, Canada, notwithstanding any principles of conflicts of law.

All disputes arising out of or relating to these Terms and Conditions shall be finally resolved by arbitration conducted in the English language in Ottawa, Ontario, Canada under the commercial arbitration rules of the Canada. The parties shall appoint as sole arbitrator a retired judge who presided in the province of Ontario. The parties shall bear equally the cost of the arbitration (except that the prevailing party shall be entitled to an award of reasonable attorneys' fees incurred in connection with the arbitration in such an amount as may be determined by the arbitrator). All decisions of the arbitrator shall be final and binding on both parties and enforceable in any court of competent jurisdiction. Notwithstanding this, application may be made to any court for a judicial acceptance of the award or order of enforcement. Notwithstanding the foregoing, Epiphan shall be entitled to seek injunctive relief, security, or other equitable remedies from any court of competent jurisdiction.

If any part of these terms is unlawful, void, or unenforceable, that part will be deemed severable and will not affect the validity and enforceability of the remaining provisions. Epiphan may, at its sole discretion and without notice, revise these terms at any time by updating this posting.
